PROFILE

I connect business and technology: I turn complex requirements into scalable software. At Loan Software I do functional analysis for strategic fintech projects and clients, combining core solution design with process optimization through AI. In parallel, as co-founder of QuickDevSolutions, I cover the full cycle: the business model with the client, architecture, infrastructure, and deployment.

EXPERIENCE

Semi-Senior Functional Analyst · Loan Software

August 2025 — Present · Buenos Aires

- Functional analysis for strategic projects and clients in fintech (lending and collections), combining core solution design with process optimization through AI.
- Discovery, translation of business requirements, and solution modeling, including flows, use cases, and API design (settlements, loans, and case management).
- I lead the artificial-intelligence projects from the functional side, setting standards, best practices, and agent workflows that simplify processes and shorten delivery times.
- Responsible for the functional design of the company's key initiatives and priority clients, making sure the final product matches the business vision.
- Working with Development and QA, validating technical implementations against the specifications (including code review) and using AI as a support tool for the final build.

Product Engineer and Co-Founder · QuickDevSolutions

July 2024 — Present · Buenos Aires

- Custom software from scratch. Direct client work: functional discovery, business rules, scope, and budgets.
- Software development and infrastructure ownership: servers, networks, and continuous deployment (CI/CD).
- Delivery of secure, scalable systems, with quality control from the first meeting through the final product.

Systems Lead · Secretaría de Obras y Servicios de José C. Paz

December 2021 — July 2025 · José C. Paz, Buenos Aires

- Development in Node.js, React Native, PHP, and AWS (EC2, RDS): geolocation, QR scanning, admin panels, and EAS-CLI deployments.
- Satellite monitoring of the municipal fleet: a 25% reduction in fuel consumption. Reports and metrics with SQL and advanced Excel.
- Operational continuity through full technical support (networks, hardware, and mobile devices) and digitization of internal processes.
- Design and development of 30+ responsive WordPress sites (Elementor and Metform), focused on performance and UX.

Hardware Technician · Tecnoo SC

July 2020 — October 2022

- Repair and maintenance of PCs, all-in-ones, and netbooks. Operating system installation and performance troubleshooting.

EDUCATION

Systems Analyst · Universidad Nacional de José C. Paz

March 2022 — June 2026 · Associate degree

Bachelor's Degree in Information Technology Management · UNPAZ

March 2022 — December 2027 (estimated) · In progress
